## I FILTER FUNNEL · EVERY MARKET TO 7

| step                 | rule                     | count | funnel |
|----------------------|--------------------------|-------|--------|
| -- sources -----     |                          |       |        |
| kalshi               | all open markets         | 6000  | #####  |
| -- clean -----       |                          |       |        |
| tradeable            | price 15-85c · not <2d   | 2600  | #####  |
| liquid               | vol24 & open interest    | 720   | #####  |
| tight spread         | yes ask-bid <= 2c        | 340   | #####  |
| -- rank & keep ----- |                          |       |        |
| candle pool          | top 40 by volume         | 40    | ##     |
| trending             | clean history + volatile | 22    | #      |
| Kaufman ER           | keep top · ER >= 0.30    | 14    | #      |
| efficiency           | keep top 7 · trend x liq | 7     | #      |

## II DAILY ENGINE · WHAT RUNS EACH DAY

- 1 read the broker -> real balance, positions, resting orders
- 2 pull every open market, keep the liquid + tradeable ones
- 3 score each survivor: Kaufman efficiency ratio x liquidity on daily candles
- 4 protect, always: every position trails a stop (no native stops -> per-run exit)
- 5 follow the trend: buy yes if rising, no if falling · 9% stake, limit only
- 6 send the daily Telegram PDF + heartbeat

## III PARAMETERS

|         |                                                                          |
|---------|--------------------------------------------------------------------------|
| truth   | every run reads the real Kalshi portfolio: balance · positions · orders  |
| score   | Kaufman efficiency ratio (trend / noise) x liquidity · ~30d candlesticks |
| protect | always: each position trails a stop (high-water - 8c) · per-run exit     |
| entry   | follow the trend: yes if rising, no if falling · marketable limit · 9%   |
| orders  | limit orders only, never a raw market order                              |
| report  | daily Telegram PDF + heartbeat (dead-man switch, cron-gap alert)         |

run always live · cron 22:30 UTC Mon-Fri (1h after alpacaMarkets)
